

DNS-100

- **Eliminate waste hauling**
- **Minimize hazmat liability**
- **Maximize operator safety**

The **DNS-100 (Developer Neutralizing System)** is designed to automatically neutralize the developer from CTP positive and thermal printing plate systems. This state-of-the-art system blends and mixes the developer, wastewater, pre-bake, finisher, and neutralizing agent to a neutral pH, enabling safe discharge to the drain. An optional pH controller is available for monitoring, alarming, and recording pH levels.

Features & Benefits

- Eliminates the expense of hazardous waste hauling and associated liabilities
- Fail safe (off-line) operation ensures production is not affected
- Monitors overflow conditions
- Computer controlled to minimize operator intervention
