

Specialty Products

Trebla-K chemistry is designed for KIS™ processors, and other manual replenishment systems. The 10 minute film process is unique to KIS™, producing consistent negatives with bright, clear images that are easy to print.

Trelux-K 10-Minute Film Kit

Trelux-K 10-Minute Film Kit contains all of the chemicals needed to process C-41 film in KIS™-type processors. It produces high quality, consistent, clear images that are easy to print. Kit includes a Type III bleach for maximum performance with all film types. Replenishment rates vary depending on film type and processor utilization.

Cat. Number	Size	Shipping Weight
