

# Lab Cleaning

---

## Rack Attack!

---

This industrial-strength rack and tank cleaner is designed specifically for the photo industry. It can be used directly from the bottle as an aggressive rack, gear, and parts cleaner, or diluted with water to clean developer tanks. It will not damage plastic, nylon, or PVC parts, pumps, or hoses. Rack Attack is chromium-free, and each 32 ounce bottle prepares 8 gallons of tank cleaner.

Cat. Number	Mix Size	Shipping Weight	
70CL718	6 x 32 ounce	14 lbs.	6.4 kg

---

## Clean-PAC

---

Keep your lab fresh and clean with CleanPAC—a collection of Fuller Brush products. This package contains: a practical caddy; Photo-Ease™, an industrial-strength, biodegradable cleaner; one durable rack brush and one tank brush; Spray'n Sparkle™ glass and surface cleaner; Spray'n Away™ general purpose cleaner; sponge scrub cloth; rubber gloves; and pHotoDerm™ hand cleaner.

F000101	Clean-PAC Complete kit	15 lbs.	6.8 kg

---

## pHotoDerm Soap

---

This hand soap was designed with photofinishers in mind. Its unique formula deep-cleans the skin to neutralize odors and remove chemical residue associated with photofinishing and X-ray processing solutions. pHotoDerm is pH-balanced to neutralize the effects of color developers and help reduce the risk of contact dermatitis. Available as individual bottles or cases of 50.
